

Daklem.. stabilna verzija Kohe je 3.6.2.

NaÅija Koha na IRB-u je 3.4.4 pa idem upgrade-ati.

BuduÄ i da smo na git-u, prebacit cu se na 3.6.x branch

1. U source direktoriju smo

PovuÄ emo update

```
# git pull
```

Provjerimo branch-eve

```
# git branch -r
```

Pratimo 3.6.x

```
# git branch --track 3.6.x upstream/3.6.x
```

Prebacimo se na njega

```
# git checkout 3.6.x
```

Provjerimo jel to to

```
# git branch  
# git status
```

2. standardni Koha upgrade (bez make test)

```
# ./koha_perl_deps.pl -u -m  
# perl Makefile.PL --prev-install-log /usr/share/koha/misc/koha-install-log  
# make  
# sudo make install
```

3. Update database

Ulogiramo se u admin suÄ elje i pokrenemo update

Sve ok.. osim nekoliko greÅjkica koje se mogu ignorirati:

Update errors :

```
* [Mon Dec 26 14:46:19 2011] updatedatabase.pl: DBD::mysql::db do failed: Duplicate entry 'Basket
```

```
