

```
git checkout -b bug_xxxx origin/master
git bz apply XXXX
git commit --amend -s
git bz attach -e XXXX HEAD
```

## Ako ne prolazi database update:

```
git am --abort
git am -3iu /tmp/Update-database-patch-xxxxx.patch
```

resolve conflict ili ako otkrijeÅ¡ greÅ¡ku koju znaÅ¡ popraviti, onda:

```
git add <file>
git am --resolved
```

ako zeznem merge:

```
git diff origin/master opac/opac-detail.pl
vi opac/opac-detail.pl
git add opac/opac-detail.pl
git commit --amend
```

edit kohaversion.pl

## Ako patch ima viÅ¡e fajlova:

```
git bz apply 7743
git am --abort
git am -3iu /tmp/Update-opac-userpl-to-use-KohaDates-TT-plugin-hYYLn8.patch
vi opac/opac-user.pl
git add opac/opac-user.pl
git am --resolved
```

idem ispoÅ¡ etka:

```
git bz apply 7743
```

a na ono Å¡to je proÅ¡lo apply odgovaram s "n"

onda rebase, na zadnji prije patcha kojeg testiram

```
git rebase -i 35279926b3865b003c6bd01d5c5378addfa903a9
```
