

How to make new batch using mysql?

```
mysql> select '232' as batch_id, itemnumber as item_number, 'SRE', 'Labels'  
into outfile '/tmp/zpm-label-batch.txt' from items where homebranch = 'ZPM'  
and enumchron is null order by copynumber + 0;
```

```
mysql> load data local infile '/tmp/zpm-label-batch.txt' into table  
creator_batches (batch_id, item_number, branch_code, creator);
```
