

Instalacija zpl printera na Windowse

Nova verzija printanja koristi Koha Spine Label printanje i zahtjeva instalaciju Zebra printera na Windowsima prema uputama na <https://github.com/dpavlin/Printer-Zebra/blob/master/README>

Video instalacije

Upute za instalaciju Zebra printera / Vivainfo

Pritanje signatura zahtjeva ODBC driver za MySQL i korisnika na bazi sa kojim će se spajati program.

Nazivi korisnika:

- printer_zs - Zatvoreno spremište
- printer - svi ostali printeri, migrirati na nazive

Dodavanje korisnika u MySQL:

```
dpavlin@koha:~$ mysql -u root mysql
```

```
mysql> create user printer_zs identified by 'password_za_ovaj_account' ;
Query OK, 0 rows affected (0.01 sec)
```

```
mysql> grant select,insert on koha.items_print_log to 'printer_zs' ;
Query OK, 0 rows affected (0.15 sec)
```

```
mysql> grant select on koha.items to 'printer_zs' ;
Query OK, 0 rows affected (0.00 sec)
```

```
mysql> grant select on koha.biblio to 'printer_zs' ;
Query OK, 0 rows affected (0.00 sec)
```

Passwordi za printere nalaze se na zaštićenom wiki-ju: Zebra printer

Provjera:

```
mysql> select * from tables_priv ;
```

Host	Db	User	Table_name	Grantor	Timestamp	Table_priv
%	koha	printer	items_print_log	root@localhost	2009-03-27 12:12:17	Select,Inse
%	koha	printer	items	root@localhost	2009-03-27 12:14:38	Select
%	koha	printer	biblio	root@localhost	2009-03-27 12:15:03	Select
%	koha	printer_zs	biblio	root@localhost	2010-03-09 14:26:30	Select
%	koha	printer_zs	items	root@localhost	2010-03-09 14:26:24	Select
%	koha	printer_zs	items_print_log	root@localhost	2010-03-09 14:26:19	Select,Inse

6 rows in set (0.00 sec)

Stare biljeÅke:

Iz tablice `items_print_log` obnoviti podatak `items.datelastseen`.
