

mjexec installation of dspam

```
sudo apt-get install dspam libdspam7-drv-pgsql
```

Automatic installation using PostgreSQL doesn't really work, so we will do it manually:

```
createuser dspam  
createdb --owner dspam --encoding utf-8 dspam
```

```
cd /usr/share/doc/libdspam7-drv-pgsql  
psql dspam dspam < pgsql_objects.sql  
psql dspam dspam < virtual_users.sql
```

And then, more or less follow

<http://www.kirya.net/articles/setting-up-dspam-as-a-filter-for-postfix-on-debian-sarge/>
