

I will try to collect useful info about Linux I2C infrastructure

- writing regmap drivers
<https://opensourceforu.com/2017/01/regmap-reducing-redundancy-linux-code/>
- Using the I2C-Stub to Emulate a Device
<https://eraretuya.github.io/2016/12/10/the-i2c-stub-in-action/>
- very good overview of i2c and bus arbitration and testing
<https://elinux.org/images/c/c9/ELCE17-WSang-I2C-Fault-Injector.pdf>
