

## Jifty notes for installing production Jifty instance on Debian etch

tar xvzf 3068 [0,0]

Contents: [Dobrica Pavlinu's random unstructured stuff]

- Dobrica Pavlinu's random unstructured stuff (/etc/apt/sources.list)
- Dobrica Pavlinu's random unstructured stuff (packages)
- Dobrica Pavlinu's random unstructured stuff (configuration)
  - ◆ Dobrica Pavlinu's random unstructured stuff (SMTP)
- Dobrica Pavlinu's random unstructured stuff (application)

## /etc/apt/sources.list

```
deb http://debian.carnet.hr/debian etch main contrib non-free
deb http://security.debian.org/ etch/updates main contrib non-free
deb http://debian.jifty.org/debian etch jifty
```

## packages

```
sudo apt-get install subversion make svk ssmtp jifty libmodule-install-perl
```

## configuration

### SMTP

Edit `/etc/ssmtp/ssmtp.conf` to include valid mailhub

Apply patch [#24482](#) to `Email::Send` to fix mail sending or execute following command:

```
sudo ln -sf /usr/sbin/sendmail /usr/local/bin/
```

## application

```
svk co svn+ssh://llin-svn/home/dpavlin/private/svn/Arh
cd Arh
perl Makefile.PL
```

```
# sudo is needed if you don't have all modules
sudo make
```

```
./bin/jifty schema
```

```
./bin/jifty server
```
